

Oil Change

on wind turbines
of all types

Windparkservice

installation | maintenance | oil change

Our services:

- Journey to the wind turbines with oil truck
- Extracting waste oil from hydraulic aggregates or gearboxes
- Flushing all components
- Changing filter elements
- Cleaning oil-level glasses
- Filling the systems with genuine and filtered clean oil according to specifications
- Disposing of waste oils and waste filters and obtaining waste management certificates

Benefits:

- Transporting clean oils in the manufacturers' original packages
- Safe handling of waste and clean oils by oil-pans on the track
- Good oil flow properties by temperature-controlled truck body
- No mixing of oil-typs
- Independent changing of oil without additional operating or assisting staff
- Shortest wind turbines downtimes
